

### Goulds 3171 / CV 3171

Vertical Sump and Process Pumps

### Goulds Model 3171

Vertical Sump and Process Pumps Designed for the Total Range of Industry Services

- Capacities to 3,180 GPM (722 m<sup>3</sup>/h)
- Heads to 344 feet (105 m)
- Temperatures to 450° F (232° C)
- Pit Depths to 20 feet (6 m)

### Design Features

- Self-Priming
- Rugged Double Row Thrust Bearing
- Heavy Duty One-Piece Shaft
- External Impeller Adjustment
- Available in a Wide Range of Alloys
- Open Impeller Design
- Vapor Proof Option: Choice of packing, or mechanical seal for containing sump vapors

#### Services

- Industrial Process
- Industrial Sump Wastes
- Molten Sulfur
- Tank Unloading
- Corrosive and Non-Corrosive Liquids

The "Veteran" vertical sump and process pump. Thousands of installations – industrial process, sump drainage, corrosive liquids, pollution control, molten salts – attest to the 3171's remarkable performance. Simple mounting.

### Model 3171 Vertical Sump and Process Pumps

Heavy Duty Design Features for a Wide Range of Services.

### Optional Features for Application Flexibility

Goulds offers a variety of options to meet users' specific plant and application requirements. Your Goulds representative will be glad to recommend the features best suited to your particular service conditions to assure safe, efficient and reliable operation.

### Molten Sulfur Pumps

- Jacketed column and discharge pipes (tested to 150 PSIG [1034 kPa])
- Available in all principal alloys
- One-piece, self-lubricating, graphite impregnated steady bearing
- Vapor-proof construction to seal sump vapors
- Balanced, low NPSH, semi-open impeller for optimum performance
- Multiple intermediate bearings permit overall settings to 20 feet (6 m)

### Abrasive Liquids

Goulds sealed bearing arrangement is recommended for applications where abrasive solids are in the pumpage and no clean flush is available. A carbon bearing and lip seal is used for sealing the bearing housing. Spring loaded grease cup is provided.

Sealed Bearing Arrangement

### Mounting Systems

Goulds can provide optional mounting systems to meet specific user requirements including pit covers fabricated with float control mounting points, man holes for access, vapor-proof designs, and lube line holes.

### Float Controls

The widest range of float controls is offered to suit the individual requirements of every installation. Ask your Goulds representative for a complete list of options

Ball-Operated Float Switch

Displacer Type Liquid Level Switch

Pipe-Mounted, Direct Acting Float Switch

### Other Options

- Complete line of controls and starters
- Enclosed lineshaft
- Other types of float controls
- ANSI tank mounting
- Flanged discharge connections

### Optional Bearings

Goulds offers the best choice of steady bearings to meet service requirements: optional fluted rubber with rigid shell, bronze, and (standard) carbon.

### Designed to Meet (or Exceed) Today's Tough Environmental Requirements

Installed in 1988 on hydrocarbon waste sump service, this 3171 was easily retrofitted with vapor-proof construction including a ferrofluidic seal to meet tougher EPA emission requirements. Readings were less than 30 ppm – exceeding EPA requirements.

Optional Upper Stuffing Box

### Hydraulic Coverage

### Hydraulic Coverage

### Maximum Sealing Flexibility: Vapor-Proof Construction

Optional upper stuffing box allows use of wide range of sealing arrangements to meet specific user requirements for sealing toxic, hazardous, noxious or corrosive fumes. With this option, the discharge pipe and all fittings are sealed at the support plate. Your Goulds representative will gladly recommend the best sealing solution for your service, some of which are illustrated here.

PACKED BOX Standard vapor-proof sealing option. Includes packing, lantern ring and grease lubricator (not illustrated).

DOUBLE CARTRIDGE SEAL Available in wet or dry versions to control emissions.

DRY RUNNING SEAL Dry running, non-contacting cartridge gas seal. Pressurized air barrier between seal faces prevents vapor leakage.

SINGLE OUTSIDE SEAL Mechanical seal with oil lubricator and sight glass. Outside mount has no metal parts in contact with vapors.

### Goulds Model 3171

Vertical Sump and Process Pumps Designed for the Total Range of Industry Services

- Capacities to 1,300 GPM (295 m<sup>3</sup>/h)
- Heads to 230 feet (126 m)
- Temperatures to 450° F (232° C)
- Pit Depths to 20 feet (6 m)

### **Design Features**

- Self-Priming
- Rugged Double Row Thrust Bearing
- Heavy Duty One-Piece Shaft
- External Impeller Adjustment
- Available in a Wide Range of Alloys
- Recessed Impeller Design
- Sealless Design
- Optional Vapor Proof Construction

### Services

- Fiberous Wastewater
- Industrial Process
- Industrial Sump Wastes
- Tank Unloading
- Corrosive and Non-Corrosive Liquids
- Food Processing
- Chemical Slurries

The CV 3171 is a recessed impeller, circular volute type sump pump. Ideal for large solids and shear sensitive fluids. It will pass any solid that will pass through the discharge pipe. Circular volute minimizes radial loads, making this the ideal pump for low flow process applications.

# Model CV 3171 Vertical Sump and Process Pumps

### Heavy Duty Design Features for a Wide Range of Services.

### LABYRINTH BEARING SEAL Prevents premature bearing failure due to lubricant contamination **OPTIONAL UPPER** STUFFING BOX HEAVY COLUMN PIPE Provides rigid support for pump and bearings LINESHAFT STEADY BEARING Grease lubricating sealed bearings furnished as standard – best for handling fluids with solids **RESTRICTOR BUSHING** Close running bushing to prevent pressure loss from casing **RECESSED IMPELLER** Since impeller is recessed in the casing, velocities are low and solids contact with the casing are reduced. Wear rate, solids degradation, and shearing of liquids are minimized **OPTIONAL STRAINER** Recommended for services where

solids larger than the discharge of the pump can potentially enter the casing.

#### **C-FACE MOTOR MOUNTING**

Accommodates readily available C-face motors. Also available for P-base and IEC motors.

### CONTINUOUS HIGH PERFORMANCE

Original high efficiency maintained by simple external adjustment resulting in long-term energy savings

#### DOUBLE ROW THRUST BEARING

Grease lubricated – carries pump thrust load, sealed for outdoor installation

#### **DISCHARGE LOCKED** TO PUMP SUPPORT PLATE FOR STRENGTH

#### ANY MOUNTING REQUIREMENTS

Met by support plate and optional pit cover. Float switches, alternators and other control devices can be easily mounted

#### STEADY BEARING HOUSING

Precision machined register fit of column, bearing housing and casing assures positive bearing and shaft alignment. Completely interchangeable with all lineshaft bearing options

#### HEAVY DUTY ONE-PIECE SHAFT

With closely spaced steady bearings assures long life and low maintenance

#### NON-CLOG CIRCULAR CASING

Large open passageways prevent clogging when handling bulky, fibrous, or stringy liquids. Circular Volute reduces radial loads during low flow operation, extending steady bearing life.
